GIFTED AND TALENTED EDUCATION

The School Committee believes that the school, home and community must work together to help each child discover, develop and use in everyday life his/her potential. In recognition of the unique needs of children to reach their potential, each school will provide differentiated education as necessary and appropriate. The schools must foster respect for self and others, self-discipline, independent thinking and creativity. Each child should develop both the skills and will to become a productive, humane member of the community, sound in mind and spirit.

Adopted: January 7, 1986
